

# Photo Smarts – Aligning Images

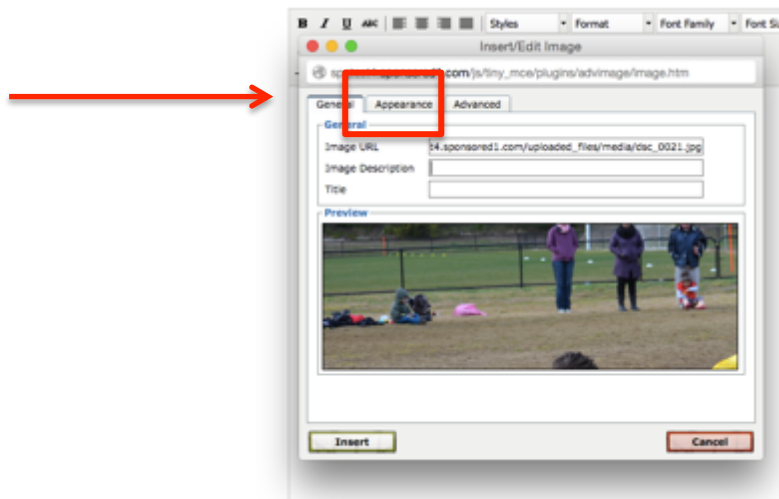

1 / 3

**Want to plant 3 images in a row on your site – all at the same height???**

1. Load your photos into the media folder. Copy the URL of the first photo you wish to work with.
2. Go to the page you wish to plant your photos and put your cursor where you want your first image to appear.
3. Click on the tree button (insert edit image) and paste the URL of the image into the INSERT URL box.

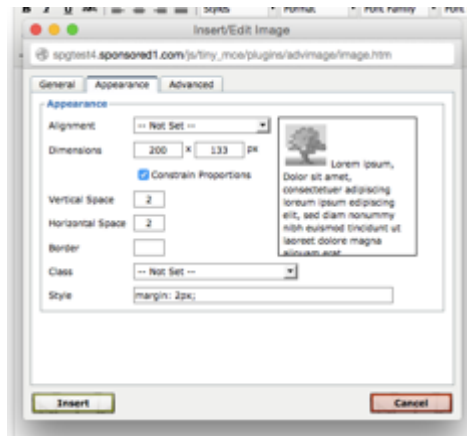

4. Now click on the “Appearance” tab. Change the dimensions to something between 200 – 400 pixels (depending on how large you would like the photo. You should also add vertical and horizontal space of at least 2 (otherwise the images will push into each other). *See the next example.*

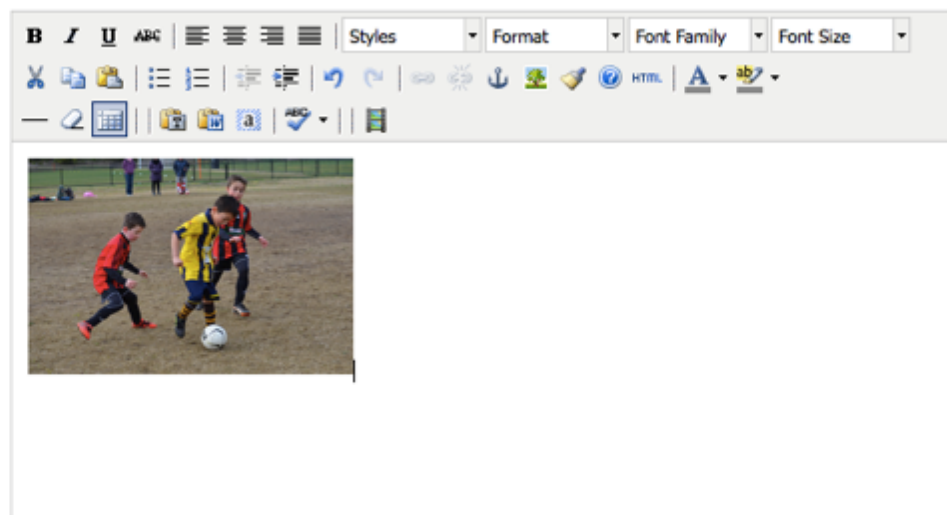

# Photo Smarts – Aligning Images

5. Dimensions – 200 px width. Vertical & Horizontal spacing at 2.

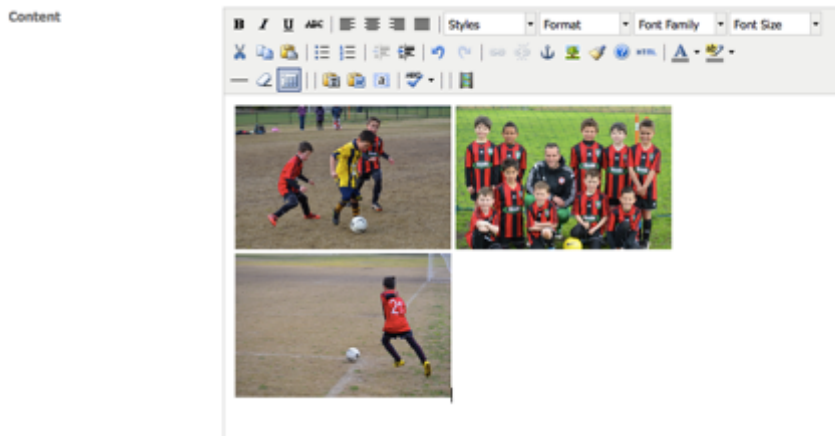

6. Click insert. You will land back on your page with your first photo. Repeat the same process with your next two images.

## Content

7. The edit screen may display your images in two rows, ignore and update your page.

8. Visit your site and check your handy work!

## Aligning Images

### HANDY HINT

You can change the dimensions of your images if you would like greater spacing between the images or if you would like to line up more than 3 images in a row.

**Vertical spacing:** The space between the content directly above and below the image.

**Horizontal spacing:** The space between the content directly beside the image.
